-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group II in the reply filed on 8/22/05 is acknowledged. The traversal is on the ground(s) that there is no serious burden for the examiner to examine the non-elected groups. This is not found persuasive because the other Groups expand the necessary search such that it would be a burden for the examiner.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-28,43-55 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 8/22/05.

Specification

Applicants should note the disposition of the parent case in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 29,30,32-34,36-39,56,57 are rejected under 35 U.S.C. 102(b) as being anticipated by Pierce (5947396). Pierce shows a horizontal hammermill having an

upper inlet, lower outlet, a rotor assembly having a plurality of hammers, rings 66, and wear plates 58.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 31,35,58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pierce in view of Jadouin. Pierce does not use spacers which may result in unwanted misalignment. Jadouin solves this problem by disclosing similar apparatus including the use of spacers 36. In order to properly align the hammers, it would have been obvious for one of ordinary skill in the art to modify Pierce by providing spacers, taught to be desirable by Jadouin.

Claims 40-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pierce as applied to claim 29 above, and further in view of Graveman et al. Pierce does not show use of a grate which may result in large particles being able to escape prior to being comminuted. Graveman et al solves this problem by disclosing similar apparatus including the use of grate assemblies. In order to ensure proper material comminution, it would have been obvious for one of ordinary skill in the art to modify Pierce by providing a grate assembly, taught to be desirable by Graveman et al.
